As a UK leading fuel and environmental services provider, Crown Oil is dedicated to ensuring continuity of supply on a national basis.

In advance of us leaving the European Union on 31 December 2020 and in line with government guidance, we have completed a comprehensive business review to identify, where appropriate, any contingency measures that could be taken to ameliorate any potential impact that Brexit might have on the business.

Crown Oil already has an extensive national supply chain, procuring fuel from a wide range of UK terminals and refineries. We have taken further measures to help avoid supply issues such as increasing storage capabilities and stock levels to over 20 million litres across our various sites.

We are continually monitoring the ever-changing situation and are in regular communication with the appropriate organisations and authorities to evaluate any new developments and revise our plans as appropriate.

Crown Oil is on hand to help our customers put plans in place should you need to overcome any potential fuel shortages. If you have any further questions, please do not hesitate to get in touch.

Issued 6th January 2021
